Engineer statement:

I certify that the concrete placing boom, including its outriggers and ancillary equipment, has received its major safety inspection in accordance with the instructions of the Concrete Pumping Code of Practice 2019 and is safe to use. This inspection includes mechanical, structural and hydraulic items of the unit. Where manufacturer's inspection criteria exist, these have been followed for the purposes of the major inspection.

Engineer signature:  Date: 26th March 2024

Comments: For the suitability of continued service the unit and associated equipment shall be inspected at intervals not exceeding 1 year by a competent person. The inspections shall be in accordance with the manufacturer's specifications.
